

Ansbaoh begin may 2020

Dear Greta!

I want to encourage you with my letter. Some might think in this Coronacrisistime the climate problem is no more of actuality. But it is not. Even the Pope says "How the human can be healthy if they destroy mother earth. And so do I. So I hope you agree with me, that the Coronapandemee and the climatekatastrophe belongs together.

That's why I am very glad that you started the action of fridays for future, because I lost tho believe in a critical Youth.

For my own I am an old school protetant. In the 80ties we walked in a protestmarch from Nuermberg to Wackersdorf to stand up against the WAA {recycling factory for atomic trash). The WAA was gladly never built, our protest was nearly successfull.

But what I recognized was: the protest of the people was always were against something and nobody is for something in a positive view. So I searched for a point that oonnected every human of this world. So I must not look for a long time. Pretty soom [yes I am a very harmonizer man) I saw the problem and so I came to the result. But let me tell you first - informer times we had the Irion Curtain between the East and the West. I always ask me, why do the democracy people do not like the communists and other way round. Of corse my opinion in that all humanistic ideals are good and they are not opposites. So I began to fit {look at by name) all human ideals together to create a one world socenty with the akronyn nam C.A.S.C.A.D.E. "The United nations of Cascade" that means:

- C. hildren of mother earth living in a
- A. narchy together in a
- S. ocial freeclass society in a
- C. ommune worldwide as an
- A. utarchy folk where we are all souverans in a
- D. emocratic republic in an
- E. erthfriendly way to lire and beeing

But the real reason why I write you is your opinion that the politics do not do enough for the climate and by good, Greta, you are strictly right.

So I was wondering a lot that the people followed brave the orders against the Coronavirus in any nation to save old peoples life. So I ask me again "if they do all that orders to save people, why they can not do instructions to save our earth?"

So deer Greta, say it to all the leaders of the world - that they have to come together to tell their people:

- Stop making war (make love not war)
- Stop industrial animals production and fishing
- Stop the holocaust with animals get vegetary or vegan

Stop distroying the ground, the water, the air, the plants  
Stop with individual car traffic, ride bike or get on a train  
Stop flying with planes, ride on ships or ballons slow the life  
Stop with fossile energy production, make clean energy  
Stop the great differeneoe between rich end poor. Start sharing  
Stop the religions. We only got one earth and one creator,  
Stop all the hunger and violence and get together to make love  
and pease all over the world and as long as we are overpopulating  
earth - make sex not babies.

I em shure that you like what I like and 90% of the humans also  
do. If you mind that 5% of the people own 90% of the capital,  
it must be clear who will pay for our f r i e n d l y revolution.  
Thats why I beg you, Greta, let's realize paradise now, before  
it is too late.

Pleae answer me quick, or corse our time ie rare.  
So I wish you good luck and stay healthy.

Your

Thomas Fitzthum

P.s. I think that this letter must be an open message. That's  
why I'll publish it on my web site and I will send it to our  
local "fridays for future people" if you like.
